Here to help with product choice

SIG Interiors is the UK’s leading specialist supplier of interior fit-out products to the construction industry.

With local branches located throughout the UK, SIG Interiors offers an unrivalled range of products to suit any commercial project.

Experienced and dedicated personnel are on hand to offer sound technical expertise on the best solutions for your application. An extensive stockholding across the UK allows for a rapid response to your order and our specialist fleet of vehicles means we can work with you to meet tight deadlines and logistical issues on the most challenging of products.

As part of the SIG Group, SIG Interiors can also access a full range of insulation, technical insulation, fixings, construction accessories and now also commercial drainage products.

For details of your local branch visit www.siginteriors.co.uk

SIG Business Support

SIG has teamed up with a number of carefully selected third parties to offer our customers a combined, unique and market leading package of financial services. SIG customers can exclusively benefit from discounted rates and in some cases privileged access to business enhancing products not freely available elsewhere to help secure additional finance, increased cash flow and enhanced internal risk processes.

Visit us today at: www.sigfinancetools.co.uk to find out how you can achieve competitive advantage and ensure your business is protected and financed for future growth.

Specialist Solutions at a Glance

...All the solutions and leading brands

SIG Interiors offer the widest range of high quality interior products for all commercial market sectors including offices, education, healthcare, retail and leisure.

...Solutions for all wall, floor and ceiling applications.

www.siginteriors.co.uk
Throughout the construction industry, the disposal of waste materials from building sites is becoming more prevalent. This is an increasingly complex, difficult to manage and inevitably expensive process. Regulations now often demand the segregation of waste materials which impacts heavily on the supply chain with the onus of responsibility on both main and subcontractors for adopting effective recycling measures. As SIG are fully committed to high standards in quality, performance and environmental responsibility across all its operations, SIG Interiors have a number of waste management and recycling solutions available.

Mineral Ceiling Tile Waste
Mineral ceiling tile waste can be recycled by SIG Interiors in one of two ways:

- **End of Life**
  Specifically targeting refurbishment projects the End of life scheme enables project teams to sustainably dispose of suspended ceiling products when new tiles are being installed.

- **Off-Cut Scheme**
  Enables new build ceiling contractors to recycle ‘offcuts’ by providing bags to collect the material, which can then be sent for recycling.

As SIG conform with all the relevant waste transfer requirements, we can help our customers save money and reduce the amount of waste going to landfill.

**Ceiling Recycling Guide**
A dedicated guide for the two ceiling tile recycling schemes is available from your local ceiling tile stockist.

Did you know?
- 2,600m² recycled tiles = 1,399 tyres or 12,694kg of waste diverted from landfill
- 10,000m² recycled tiles = 590 tonnes of raw materials used or the equivalent of 80 months of electricity for your home.

[Visit www.siginteriors.co.uk for more information]

*Full packaging guidelines are available on request.*

---

**Recycling Solutions**

How does End of Life recycling work?

New ceiling tiles are manufactured with recycled material

Tiles are supplied to a project by SIG Interiors branches

Tiles are returned to Armstrong® for Recycling

Tiles are installed on a site

At the End of Life tiles are collected by SIG Interiors. Full tiles are to be stacked on pallets and shrink wrapped in preparation for collection*

[See the alternative process for the Off-Cut programme]

**Off-Cut programme**
SIG Interiors will provide suitable bags to be filled with ceiling tile waste. Bags are collected and returned to make new Armstrong® ceiling tiles.

**What are Off-Cuts?**
Part ceiling tiles which are waste material when a new ceiling is installed.
SIG Interiors offer a comprehensive range of suspended ceiling tiles and grid systems manufactured from mineral fibre, glass/rock fibre, gypsum and metal to meet demanding performance requirements. With ceilings and lighting from the leading manufacturers, the possibilities are endless.

**Product and Project Support**

Not only do we supply the leading manufacturers’ products, we can support you or your client with everything from initial concepts or product identification to installation of tile and grid systems. Standard products are held locally at your SIG Interiors stockist and advice on bespoke products is available to meet the most demanding of concepts.

Products to suit education, retail, healthcare, leisure and office applications are encompassed in the SIG Interiors offering with no job too big or small!

A wide range of ancillary products including lighting, ceiling canopies and fixings help complete any project.

Inspire, discover and explore with www.ceilings.co.uk

**AIS FPDC Ceiling Sustainability Partnership**

SIG Interiors is dedicated to reducing industry waste and therefore are members of the AIS FPDC Ceiling Sustainability Partnership. A steering group of manufacturers, distributors and installers of suspended ceilings, established to ensure that the resources used to manufacture mineral wool ceiling tiles are not wasted or having a detrimental impact on the environment.

SIG Interiors has a dedicated ceilings portal where everyone from end client to an architect can be inspired with product choice and ceilings industry developments, discover hints and tips for installation or explore the finer details or performance standards of products.

**Ultima**

A white non-perforated surface ideal for demanding requirements. A durable, high performance product designed to provide an excellent combination of sound absorption and sound attenuation.

**Dune**

The Dune range features a microperforated finely granulated surface texture and offers improved durability, enhanced acoustical qualities, a humiguard warranty and is fully recyclable.

**Fine Fissured**

This lightly fissured, non-directional surface provides effective sound absorption and high performance characteristics.

**Grid**

Armstrong® Prelude TLX (hook Clip) and XL (Stab Clip) are available in standard grid widths of 15mm and 24mm. Stitched to enhance the torsional strength. Corrosion resistant grid and a variety of colours are also available.

**Metal Tiles**

Standard tiles are available for installation in conventional grid systems and flexible size plank and tiles where modules must be adapted to the needs of building layouts and aesthetics.

**Canopies**

The Armstrong® range of Canopies (Axiom Classic, Axiom Knife Edge, Infusions, Optima, Orca) and Ultima Canopy) allows the specifier to sculpt, create and accentuate an open space and enhance acoustics.

- **Infusions Canopy**
  
  Available in a number of different textures, including wood, metallic and crystalline finishes, and a choice of 16 colours that range from soft translucent shades to deeper, more saturated tones.

- **Optima Canopy**
  
  A mineral panel pre-formed into a convex, concave, square, circle, hexagon, trapezoid or parallelogram shape.

- **Ultima Canopy**
  
  A mineral panel, pre-formed into a convex or concave shape.

- **Orca Canopy**
  
  A metal Canopy available in three different designs, flat, concave and convex.

- **Axiom C Canopy & Axiom Knife Edge**
  
  A perimeter trim system. Designed to create “ceiling clouds” in conjunction with full size tiles.
The following mineral tiles, made from stone wool, are available in standard sizes 600 x 600mm and 1200 x 600mm with an extensive range of further sizes available on request.

**Artic**
Affordable range of 15mm thick, smooth white tiles in semi-concealed and visible grid options. Good functionality for a variety of areas, ideally suited for areas requiring minimum Class C sound absorption.

**Alaska**
Standard range of attractive smooth white tiles in semi-concealed and visible grid options. Good functionality for a variety of areas. Highest Class A sound absorption.

**Koral**
Attractive micro-textured tiles with a wipeable surface, suitable for a wide variety of applications. Highest fire safety (Class A1) and sound absorption (Class A) plus non-hygroscopic and dimensionally stable even at humidity levels of up to 100% RH.

**MediCare**
- The MediCare range comprises Standard, Plus, Air and Block
- Standard and enhanced cleaning and hygienic properties for use in healthcare environments (compliant with HBN 00-10, TDM 4032:0.6 and HTM 60)
- MediCare does not contribute to the growth of MRSA (compliant with HBN 00-10, TDM 4032:0.6 and HTM 60)
- Highest fire safety (Class A1) and sound absorption (Class A) plus non-hygroscopic and dimensionally stable even at humidity levels of up to 100% RH

**Sonar**
- Total design freedom thanks to extensive choice of module sizes and edge details – allowing for innovative and inspirational ceilings
- Unique combination of highest fire safety (Class A1) and sound absorption (Class A) plus non-hygroscopic and dimensionally stable even at humidity levels of up to 100% RH

**Rockfon Color-all®**
34 exclusive colours for acoustic ceiling and wall solutions to inspire and enhance your interior design scheme. Subtle to bold long lasting colours, arranged in six themes. Total design freedom due to exposed, semi-concealed and concealed edges in a large variety of module sizes.

**Rockfon® Suspension Systems**
Chicago Metallic suspension systems are available from Rockfon® in standard grid widths of 15mm and 24mm to create semi-concealed or visible grid solutions.

**Rockfon Eclipse® Islands**
- Innovative and aesthetically pleasing frameless acoustic islands offering excellent sound absorption
- Quick and easy to install, used alone or when a traditional suspended ceiling cannot be installed
- Available in square, rectangular or shaped formats with bevelled edges for maximum design freedom
- Perfect for thermal mass installations with rear surface providing excellent heat and light reflection
- Rockfon Eclipse islands can be specified in white or in an unlimited number of custom colours, using the NCS system for perfect colour matching

**Rockfon Contour® Baffles**
- Economic and aesthetically pleasing flameless acoustic baffles
- Quick and easy to install, used alone or to enhance the sound absorption of an existing ceiling
- Ideally suited for enhancing acoustics in thermal mass areas or where frequent and unhindered access to services is required

Acoustical gypsum ceiling tiles and linings for a variety of applications. Available in a large choice of sizes and perforation designs.

**Perforation Designs**
- NEW L6: 6mm circular holes at 15mm c/c, and 15mm to edge of tile.
- Tangent: 4 x 14mm oval holes at 10/20mm c/c.
- Micro: 3 x 3mm square holes at 8.3mm c/c.
- Quadril: 12 x 12mm square holes at 30mm c/c.
- Globe: 6mm circular holes at 15mm c/c.

**Unity 6 Family**
Ceiling tiles with perforation design to the edge of the tile and concealed grid for a continuous look. Unity 6 System is a suspended, demountable ceiling. Unity 6 Bridge is a self-supporting ceiling. Unity 6 Fix is non-demountable ceiling lining with concealed fixings.

**Visona**
Acoustical rectangular ceiling tiles in double T-grid system requiring no cross runner. Easy access to installations. Available with Tangent perforation design and non-perforated.

**Contur**

**Belgravia**

**Corridor**
Self-supporting acoustic ceiling tile, with a concealed grid. Primarily used in corridors, small utility and ancillary rooms. Variations available to provide a solution for fire escape routes. Available with a choice of 4 standard perforation designs.

**Designpanel**

**Contrapanel**
Impact resistant & acoustic lining for ceilings and walls in sports halls, gymnasiums and similar premises. White, foil-covered surface. Available with Globe perforation design.

**Mitex**
Mitred panels for creating precise, knife-sharp edging. Ideal for example, covering of bulkheads or creating edges for ceiling islands.

**Adit**
Acoustic lining ideal for refurbishment of existing rooms requiring acoustic regulation. Supplied as a complete kit including all accessories, Installation time per panel: 30 minutes. Available with Tangent perforation design.

**Knauf Danoline Grid System**
Steel suspension profiles. Standard colour: 001 white. Standard widths: 15mm and 24mm
Ocelot PowerGrid
New and exclusive to SIG, Ocelot PowerGrid is a 24mm high quality, innovative suspended grid system which is suitable for all projects and compatible with a wide range of lay in tiles.
• A superior coating ensuring a superb finish
• Guaranteed faster, accurate and efficient installation
• Stab bayonet connection with no need for tools to fix the product in place
• Robust design offers a lighter, easier to transport product
• CE marked and offering a 15 year product guarantee
• A complete ceiling package for peace of mind and product confidence

Acoustic Modular Ceilings
Acoustic ceilings in a range of edges and finishes, from the simplicity of Advantage, Clinic and Gedina to the design opportunities provided by Focus, the cleaning options of Hygiene or high acoustic absorption of Master. Create patterns with Master Matrix, or striking linear designs with Focus Lp, whatever the application. The use of unique 3RD technology, with a plant based binder and up to 70% recycled content, makes Ecophon’s systems highly sustainable.

Free Hanging Units and Baffles
Ecophon’s free hanging units include the acoustic raft, Solo, in standard or bespoke shapes, as well as a range of acoustic baffles. Free hanging units are ideal for refurbishment projects or for thermally active buildings when a full acoustic ceiling is not appropriate.

Connect Grid
Connect is a highly accurate and precise grid. The use of Connect Grid ensures that the ceiling system will be easy to install on site and provide a high quality finish.

DONN® DX3® from AMF
Retains all the tried and tested characteristics of DONN DX but with modified features to improve the key installation and functional performance of the grid. Features include:
• An audible “click” reassurance
• 3 rib design adds rigidity
• Locked end-spice detail
• Easier to cut
• Stronger fire expansion notch
• Easy to demount both main and cross tees
• Lighter cartons
• Fully compatible with existing DX systems
OWAcoustic Premium ceilings are made from a unique, composite glass/rockwool, with natural mineral fillers to create a rigid board, specifically designed to be the most suitable substrate for suspended ceilings performance.

Acoustic performance and strength are optimised. Most popular in square edge T24, rebated edge or T15 edge detail, OWAcoustic Premium ceilings also offer one hour’s fire resistance under steel, timber, concrete or mezzanine, when installed in OWAconstruct premium T24 grid, or OWAdiq T24 grid, in 600 x 600 or 1200 x 600 modules.

**Cosmos**

Is a 15mm premium white ceiling tile with a white “spatter paint” surface available as non-perforated or needled. The needled version offers Class C sound absorption and is suitable for classrooms or noisy offices, to reduce reverberation times.

**Harmony and Finetta**

For mezzanine floors the most cost effective choice is OWAcoustic Premium 15mm in the Harmony (white, fissured) face pattern or Finetta (White, Fine Fissured).

**Sinfonia**

OWAcoustic premium ceilings with a modern, white fleece surface, offering excellent sound absorption (range includes Class A or B), combined with high dB reduction and 60 minutes Fire Resistance. Also available for very good sound insulation as Sinfonia dB.

**Pura Plain**

A white surface with a hardener in the coating to enable more frequent wet wiping in kitchen and hygienic environments.

**Aquacosmos**

Similar to OWAcoustic Cosmos, but with a special baseboard that withstands 100RH environments, such as pools and shower areas.

**OWAcoustic Smart Sandila Micro**

A popular and cost effective ‘every day’ white ‘micro grain sand’ surface, in square edge T24, rebated edge T24 or T15 edge detail.

**Taurus or Sirius**

(12mm) is a basic, square edge, fissured tile (Taurus) or needled patterned (Sirius), for use in back areas, or in low cost applications.

**The OWAconsult Collection**

A breathtaking new range of ceilings that are not constrained by the 600 x 600 square design. With the clever use of shape, size, system and lighting, ceilings are exciting design subjects for architects and designers. Trapeze, Flexo, Cloud, Square, PIK and Oriental options available.

**OWA Construct Grid**

OWAconstruct T24 grid and T15 grid is now available in both Premium (Hookon, butt edge) and CLIQ (stab connection, joggled junction). Also available is OWAline T15 slim lined grid, and T24 Corrosion Resistant systems, as well as concealed grid systems.

**OWAcoustic Fabrico**

Acoustic Wall absorbers, covered in woven fabric coloured surfaces, or Acoustic Art printed wall absorbers.

**OWA Islands & Canopies**

Independently supported islands enable freedom of design, with individualised patterns of absorbers and allow localised acoustic control. A choice of infill panels can include many white patterns and also achieve up to Class A sound absorption with fleece covered panels such as Bolero and Sinfonia A.

**Sequence Class A Absorbing Acoustic Systems**

Ceiling tiles, wall panels, rafts and baffles which offer high acoustic performance, a range of colour, size and shape options as well as impact resistant panels for sports halls.

**Gypsum Plasterboard**

A wide range of gypsum products from vinyl faced CleanCare which is cleanable, has foil on the reverse and is packed in cartons to contemporary perforated METroboard Square, Circle and Line tiles.
A wide range of Stretch Ceilings are now available from SIG Interiors. Consisting of two basic components – a perimeter track and lightweight fabric membrane which stretches and clips into the track.

**Fabric**
A fully recyclable stretch fabric material consisting of 0.2mm thick PVC. The material comes in a vast array of colours and finishes including Matt, Satin, Lacquer (mirror like), Metallic, Perforated, and Translucent for lighting diffusers, backlighting & projection. The material can be printed or painted for additional effects, is entirely waterproof, washable and impermeable to vapour. The material is maintenance free, hygienic, non-toxic and is fire rated to new euroclass standard B s1 d0 in accordance with the EN 13501.1, equivalent in the UK to Class ‘0’.

The lightweight sheets are purpose made from roll material to form any shape and size typically up to 50m² in one piece. Each panel incorporates an ultrasonically welded ‘Harpoon Edge’ which clips into the track.

**Track**
Typically PVC Semi-Concealed track is the preferred choice for most architects and designers, enabling curves, domes, vaults and many other shapes to be formed with ease. In addition to ceilings, the Stretch Ceiling system can be used for wall coverings, light diffusers, floating panels, exhibitions and creative shapes.

---

**Contact your local SIG ‘Specialist’ to find out more...**

www.siginteriors.co.uk
Speedline is a high performance brand of drywall products and accessories available exclusively from SIG plc stockists.

**Metal**
Central to the range is a comprehensive choice of UKAS accredited metal profiles and components that form the basis of dry lining, partitioning and ceiling systems that satisfy Building Regulation issues such as Part E Acoustics, Part B Fire and BS5234 Rigidity.

The UKAS accredited tests have been undertaken with the three major plasterboard manufacturers’ ranges of plasterboards to offer solutions for even the most stringent of requirements.

**Additional Benefits**
- Technical back up available
- BES 6001 and ISO 14001 certification important for BREEAM and code for sustainable homes
- Ability to cut to length so reduce wastage on agreed projects
- Full range of profiles available manufactured with CE markings

**Insulation**
A high performance thermal laminate board is available offering a dry lining, thermal insulation and vapour control layer in a single board. It achieves a thermal resistance range between 1.21m²K/W and 3.70m²K/W and is ideal for new build and refurbishment projects.

- Suitable for direct bonding and mechanical fixing
- Easy to handle and install
- Manufactured in accordance with ISO 14001:2014
- PIR foam core is CFC/HFC free and satisfies the ‘Green Guide to Specification’

**Finishing**
To help you complete the job, a wide range of finishing and jointing products are available, including:
- Aluminium Trims
- Beads
- Tapes
- Joint Compound
- Sealants and Adhesives

**Fixing**
Fixings are available to secure any drywall application.
- Drywall Screws: BZP/Self Drill/Coarse Thread
- Collated Drywall Screws
- Pan/Wafer Head Screws
- Metal Nail-ins
- Hammerfix Nylon

**Access**
Manufactured to meet demanding ceiling and wall applications, Speedline access panels will achieve customer specified needs to provide an effective and unobtrusive solution. Many of the standard panels are fire rated to EN 1634-1:2008 60 minutes integrity performance.

- Picture frame or beaded frame options
- Bespoke panels available
- Metal, plasterboard and plastic doors
- Prices for all projects

**Speedline Drywall Products**

www.siginteriors.co.uk
SIG Interiors supply a selection of British Gypsum, Knauf, Siniat and Speedline Drywall products.

Plasterboards and Metal Systems

**Standard Wallboards**
Standard wallboards are available in a range of sizes which are suitable for basic dry lining applications. Tapered edge and square edge details are available with a decorative ivory face that can be skim plastered, or supplied taped and jointed.

**Fire Resistant Wallboards**
Fire resistant wallboards are used in applications which require increased fire protection and can be finished in the same way as a standard board.

**Impact & Durability Wallboards**
Used in heavy use areas where greater impact resistance is required and can be finished in the same way as a standard board.

**Moisture & Vapour Resistant Wallboards**
Available in a range of sizes, moisture resistant boards are suitable where superior moisture resistance is required e.g. bathrooms and wetrooms. Vapour resistant wallboard is foil faced on one side.

**Sound Resistant Wallboard**
This product is suitable for use where greater levels of sound insulation are required.

**Metal Systems**
Metal systems include a number of different products, including a wide range of high quality metal studs from 48mm to 146mm widths, a full range of MF ceiling components, resilient bar, metal angle and other associated products are available.

**Thermal Laminate Board**
Thermal laminate boards provide a dry lining and thermal insulation solution in a single application and are suitable for internal lining of masonry walls and will assist in meeting or upgrading to the current building regulations.

**Fermacell Boards**
Fermacell boards are suitable for commercial, timber frame and off site constructions – a unique, single-point solution to a multitude of challenges. Fermacell gypsum fibreboard is manufactured in a variety of sizes ranging from 10mm to 16mm in square and tapered edge formats.

**Tile Backer Board**
Tile backer boards are water resistant boards that provide a durable and stable substrate. The boards are suitable for use when installing tiles in wet areas.

**British Gypsum Rigidur H**
High performance impact resistant gypsum fibre board which gives sound insulation, fire performance and fixing strength which is designed for high traffic areas.

Solutions for any Drywall Application.  [www.speedlinedrywall.co.uk](http://www.speedlinedrywall.co.uk)
Drywall Accessories

Access Panels
Purpose designed wall and ceiling panels for use in systems where there is a requirement to access services for maintenance.

Adhesive
A gypsum based compound suitable for direct bonding of plasterboard to walls, available in 25kg bags. Also suitable for thermal boards and bonding metal furring wall channels to walls.

Aluminium Trims
Plasterboard and ceiling and skirting aluminium trims are available in standard 3000mm lengths and powder coated to RAL 9010 30% gloss. Curved trims and alternative colours are available.

Beads
A wide range of beads is available for internal and external application, on the external angle of a joint, to give a clean line to plaster and render finishes.

Coving
Coving is available in various designs for decorative application at the junction of walls and ceilings.

Joint Cement and Filler
Joint cements and fillers are used to bed tapes and give a smooth finish to the joints between plasterboards.

Mesh
Security mesh and metal lathing are available as a cost effective way of securing buildings or internal spaces.

Plasters
Plasters are applied to masonry backgrounds to ensure a flat solid finish prior to decoration.

Putty Pads
The acoustic, intumescent putty pad is designed for lining electrical socket boxes in drywall constructions. The mouldable putty pads easily fit socket boxes to reduce sound travel through drywalls, whilst providing flexibility when fitting avoiding accidental tearing or puncturing.

Sanding Papers
100, 120 and 150 grit sandpapers available.

Screws and Fixings
A range of drywall screws and fixings for use with dry lining systems.
- BZP Drywall Screws (Zinc)
- BZP Self Drill Drywall Screws (Zinc)
- Course Thread Drywall Screws including bits specifically designed for installation of boards directly onto timber framework. The course thread provides excellent drive and grip for quick and easy installation
- Collated Drywall Screws, suitable for use with a wide range of autofeed screw drivers. The collate drywalls allow quick installation of screws into plasterboard
- Pan/Wafer Head Self Drill Screws
- Plugs, general purpose fixing into brick and concrete
- Metal Nail-Ins, suitable for use in concrete and full bricks for fixing brackets, straps and general items
- Hammerfix Nylon, suitable applications include concrete, brick, hollow concrete block

Tapes
A range of products used in the application of skim plasters and taping and jointing materials. Tapes are used to strengthen the joints between plasterboard or for remedial applications.

Suspended Baffles
Acoustically absorbent, fabric covered panels of a composite construction for reverberation control.

Saddle Flooring Systems
Saddle Flooring Systems are patented dry floating floors which provide an easily levelled understructure for supporting chipboard plywood and hardwood flooring.

Sanding Papers
A range of single layer overlay treatments, compatible with concrete and timber floors as well as carpet, laminate and vinyl floor finishes.

CMS Danskin Acoustics
A comprehensive range of acoustic products for soundproofing and sound absorption and insulation solutions.

Products include:
- Karma Masspanel
- Karma Joistdeck 37
- Karma Acoustic Overlay Plus 26
- Karma Easypanel
- Regupol 3912
- Karma Acoustic Pipewrap

Don’t forget to ask about Acoustics & Insulation Fixings

www.siginteriors.co.uk
SIG Interiors supply a wide range of high quality partition systems.

**Partition Solutions**
A comprehensive range of demountable and relocatable partition systems to meet all budgets and complex design specifications are available.

The selection of partitioning is made simple with SIG Interiors whilst providing solutions to the changing demands of the modern workplace. Whether your requirements are for acoustic performance, fire resistance or varied glazing configurations, there is a partition system perfectly suited to meet your challenge.

**Product Specialists**
SIG Interiors partition specialists work closely with contractors and architects across the UK to create inspiring working environments. Saving you time and money, we’ll support you through all stages of your project to establish the perfect solution.

**Estimating Help**
Using in house advanced software we can produce detailed layouts and 3D visualisations through to a full breakdown of module components and castings all with the guarantee of exceptional customer service. A team of partition specialists is available for in-the-field assistance backed up by a continually developing network of Partition Office Interior Centres nationwide.

**Partitions Online**
The dedicated Tenon website [www.tenonpartitions.co.uk](http://www.tenonpartitions.co.uk) provides comprehensive details of the full Tenon Partitions product range plus technical guidance and performance data on each system to help customers select the right product to meet project specifications. Users can also seek inspiration from best practice case studies on how Tenon Partitions have been applied at various projects around the UK. An exclusive ‘3D Showroom’ software allows visitors to view different partition fit out options in a simulated office environment. Co-ordinate products, colours, textures and finishes to simulate the look and feel of your design projects, once created, the finished design can be printed and sent to one of SIG Interiors UK wide branches for a quotation.

The Graphite range of partitions can be viewed at [www.siginteriors.co.uk](http://www.siginteriors.co.uk). A new range of design led systems that put personality and style at the heart of your work space. The Graphite range includes Initiiale, Design, Panorama & Inifinie systems all of which are interchangeable with each other.
Flexplus
A versatile and cost-effective range of partition systems for use in office environments where there is a requirement for a simple but practical office divide.

Fire & Sound
A highly versatile demountable and relocatable office partition system designed for use in both general office and light industrial areas. Constructed from steel, aluminium and plastic profiles together with plasterboard panels, 77mm and 102mm Fire & Sound systems are suitable for up to 30 minutes and up to 60 minutes fire rated applications respectively.

Audientis
A bespoke range which combines creativity, flexibility and style to provide a perfect working environment with the added benefit of rapid onsite installation.

Scion
Combines the visual appeal and luxurious finish of natural wood with the flexibility and performance of a contemporary partition system ideal for use in boardrooms and executive areas. Scion is manufactured from solid timber using an attractive range of sustainable hardwoods and other suitable timbers, allowing endless design and build options.

Vitrage
Vitrage is a double or single-glazed partition system that combines function with the clear, aesthetic benefits of silicone or dry-jointed glazing. Using a minimum number of aluminium framing sections, Vitrage provides an office divide that allows unhindered vision whilst maintaining the privacy of individual offices.

Vitrage (dB)
A stylish double-glazed system, ideal for applications where acoustic performance is paramount. Sound reduction can be achieved, whilst retaining the spacious, visual simplicity of glass. Vitrage (dB) is also available using our Ghost design features with dry slim line joints and posts facilitating faster onsite installation and a facility to allow blinds to be fitted without remote controls. The Ghost jointing system provides a pleasing aesthetic of clean lines and ultimate design flexibility for exciting office layouts and creative space usage.
GRAPHITE

Each system offers beautiful aesthetics and excellent acoustic performance. With an unrivalled range of solutions to choose from, these interchangeable and fully relocatable partitions can transform any environment into bold, bright and inspiring places to work.

**Initiale**

The FOUNDATION to the whole Graphite range, Initiale brings simplicity to your work space while still delivering appealing aesthetics and impressive acoustics. Sleek and slim line and with a range of colours and finishes including plasterboard, melamine and glass, you can easily achieve a look that reflects your working environment.

**Design**

The Design system is at the cutting edge of creativity, helping to fashion a working environment that is as individual as your client. Each unique configuration is imaginative in design and built to inspire. The system features HORIZONTALLY MOUNTED MELAMINE PANELS with block colour, timber effect and digital finishes available.

**Panorama**

A unique HUNG PANEL SYSTEM. In addition to the already plentiful options of colours and effects available in the edge-to-edge melamine panels, bespoke digital finishes of your choice can also be incorporated.

**Infinie**

MINIMALISTIC but mightily impressive – the Infinie system provides single offset glazing, which is perfect for achieving an elegant finish. These stunning partitions let plenty of light in but keep noise out with an acoustic performance of up to 44dB.
**Operable Walls**
A choice of quality engineered moveable partitions that provide effective space management. Designed to suit all applications and budgets, the range is particularly suited for use in areas where flexibility and performance are of equal importance.

**Wall Store**
Wall Store is a simple but very effective concept which utilises ceiling height modular units to provide an integrated wall and storage partition. The system provides compact and streamlined storage which can be used as both free standing room dividers or as partition walls for cellular offices. Designed to integrate with and complement the complete range of Tenon partition systems.

**Doors & Ironmongery**
Quality doors and ironmongery items to complement the range of partitions from SIG Interiors.
- **Doors & Door Veneers**
  - Standard timber doors
  - Bespoke doors
  - Single & double glazed doors
  - Automatic doors
- **Ironmongery**
The choice to satisfy both design and performance criteria.

**Glass, Blinds & Manifestation**
- **Glass**
  - Laminated & toughened safety glass
  - Toughened glass for silicone
  - Window film application (includes graphics)
  - Acoustic performance glass
  - Tinted glass
  - Specialist snapglass
  - Glass balustrading for corridors and staircases
- **Blinds**
  - Wide choice of colours in plain & perforated slats
  - Manual and electrically/remote operated blind control kit
- **Manifestation**
  Building Regulations compliant film applied manifestation allows for personalised designs and corporate logos.

**Wall Coverings**
Choose neutral finishes to provide a relaxed atmosphere or use colours and textures in line with the client’s corporate identity. Alternatively create a unique space e.g. bring the outside inside or create a feature wall.

**Melamine Panels**
Melamine panels can be mounted horizontally to create areas of block colour, timber effects and even digital finishes.

**Digital Print**
A wide choice of Muraspec and other branded vinyl and accessories are available including the option to create a truly bespoke finish through the use of digital print and large scale imagery. In addition panels or plasterboard can be pre-decorated to save time and money on site.

**PVC Wall Cladding**
Quick and easy installation with low on-going maintenance costs.
- Offering exceptional resistance to impact, chemical substances, stains and spills, which complement its aesthetic looks and easy maintenance
- Range of 11 colours available
- Easy to fabricate and form
- High fire rating
- Create stunning interior designs

**Product Specification**
- 2.5mm gloss sheet
- Available in 2 sheet sizes: 2440 x 1220mm or 3050 x 1220mm
- High fire rating EN13501/1, BS476/7 class 0

A variety of decorative finishes are available to create stunning interior designs or meet technical requirements.
Washrooms Solutions

SIG Interiors offers a solution to all washroom design briefs and budgets. Designed for speedy and easy installation, all washrooms products are supplied ready for immediate installation and come complete with all the necessary fixtures and fittings.

The range of washrooms from SIG Interiors includes ingenious features such as full length door and partition channels to retain a high quality, long lasting finish. All products are manufactured in a BSI Registered ISO 9001:2008 accredited manufacturing facility for complete satisfaction and peace of mind.

Commercial
High quality systems designed for office applications including solutions for prestigious spaces.

Directors Suites
Create areas of excellent aesthetics through a wide choice of luxury finishes and stainless steel accessories.

Education
Designed with children in mind – bright colours and manufactured from durable materials to prevent vandalism, there is a washroom solution for any installation.

Healthcare
Washroom ranges for use in healthcare environments where levels of hygiene are paramount.

Leisure
Specifically designed to provide high performance incorporating resistance to water, high humidity, and sudden temperature change.

Retail
Washroom solutions to meet the demands of any corporate or company branding.

Integrated Plumbing System (IPS)
Fast, simple and cost effective. The Integrated Plumbing System offers a complete solution for projects where concealed plumbing and services are required, but where speed and quality of installation is vital. IPS is supplied as pre-plumbed factory manufactured modules, ready to install and connect.

Accessories
A full range of washroom accessories are available to complement any project including wash basins, brassware, soap & towel dispensers, hand dryers, baby changing units and mirrors.

Disability Discrimination Act
All public and workplace washroom facilities must conform to the requirements of The Disability Discrimination Act 1995 and Approved Document M of the Building Regulations, which sets minimum standards of access of a building by all of its occupants, including the disabled. The Washrooms offered by SIG Interiors can be supplied to meet the requirements of the legislation, including colour contrasts, door hardware and the design of standard, ambulant, disabled and enlarged disabled cubicles.

Instant Availability
Pace is available ex-stock from the SIG Interiors network of nationwide branches, ensuring it is on site when you need it.

Contemporary Styling
Sleek grey contrasting panels offer a modern and stylish finish.

All in the Box
Supplied as a series of simple one-size-fits-all packs, Pace is supplied with all fixings and accessories necessary to complete the job.

Easy to Fit
Pace is designed with ease and speed of installation in mind. Full length wall and door channels conceal cut edges and eliminate fiddly cleat fixings.

Designed to Last
Durable extruded aluminium headrails and channels, plus abrasion resistant ABS edging offer long life.

Sets the Pace
Rapid delivery, easy installation and stylish design features combine with exceptional value for money – to set the pace in washroom solutions.

Exceptional Value for Money
Pace offers stylish looks and has features normally only found on more costly systems – yet Pace is competitively priced to meet the budget of practically any project.

Other washroom systems are available; please contact your local SIG Interiors branch for details.

Pedestals, Gaskets & Stringers

Pedestals, sometimes referred to as ‘up-stands’ or ‘legs’, are an integral part of any raised access floor system. The Eurodek® Raised Access Floor system incorporates a wide selection of different grade pedestals, available in a variety of heights from 26mm to over 1000mm to achieve many finished floor levels and constructed from corrosion resistant steel. A locking nut facility is available on larger pedestals.

Pedestals can be used with the full Eurodek® gasket (or cap) range. Gasket types vary dependent on the panel & system application. Stringers are available that either clip-on or bolt-on to pedestal heads to provide enhanced lateral strength and stability. They are recommended where high finished floor heights (recommended over 600mm) are required.

Accessories

- **Floor Sealer**
  A water based PVA floor sealer to prepare the floor surface and suppress moisture and dust.

- **One-Part Pedestal Adhesive**
  Supplied in 9kg tubs, one-part pedestal adhesive is convenient and easy to use to bond pedestals to pre-sealed concrete floors.

- **Two-Part Pedestal Adhesive**
  Two-Part solvent-free polyurethane adhesive is also available from Eurodek®, specifically designed for bonding pedestals to pre-sealed concrete floors.

- **Aluminium Tape & Foam Strip**
  Moisture resistant and class ‘O’ fire resistant aluminium tape for sealing the edges of cut panels and Class ‘O’ fire resistant foam strip for the perimeter panels, to fill the gap between the panel and the abutment.

- **Fire Barrier**
  Raised Access Floor Fire Barrier is a high performance foil faced high density mineral fibre slab that prevents passage of flame through raised access floor voids. Will accommodate voids from 50mm – 100mm providing up to 120 minutes fire resistance performance.

- **Lifting Tools**
  A range of lifting tools are available for use with bare panels or panels with carpet, vinyl or laminate bonded floor coverings.

- **Outlet Boxes**
  Outlet boxes are available to house power, data and telecom accessories where optimum flexibility is required. A range of sizes are available on request.

- **Grommets**
  Flooring grommets are available to allow protected access to cables through the raised access floor.

- **Lasers**
  A wide range of high visibility, self-leveling interior lasers suitable for reaching the required consistent floor height is available.

Carpets

High quality and hard wearing carpet tiles plus practical, heavy contract fibre bonded sheets and tiles for entrance areas are available to complete a project. All of these products are heavy contract quality and are ideal for use in office, retail, education, healthcare and hospitality applications, particularly where long life and heavy wear resistance is paramount.

Vinyl Floor Coverings

Stocks of tough and durable antistatic vinyl floor coverings and high pressure laminates in a wide range of colours are available to complement the majority of interior projects or to finish a Raised Access Floor. Sheet vinyl is also available on request.

Wood & Laminate

A range to suit a variety of projects that require cost effective, tough and durable finishes. Ranges of solid, semi-solid and structured hardwood finishes are available.

All these products are designed for use in retail, hospitality and commercial applications – from offices and hotels up to heavy wear areas such as airport check-in desk areas. A complete range of accessories such as underlays, adhesives, trims, tools and maintenance products complete a portfolio for the interior fit out contractor.

Don't forget to ask about Raised Access Floors & Floor Coverings Fixings
Damage to high specification finishes are costly to repair or replace and this can lead to contract delays. SIG Interiors offer a range of Temporary Site Protection products including protective coverings for Floors, Kitchens, Sanitary Ware, Stairs and Doors both internally and externally. Products are designed to provide protection of materials and finishes in construction projects until the building is handed over at completion.

**Floor Protection**
- Low tack, carpet protection films
- Film dispensers
- Flame retardant TwinShield boards
- Tack mats for heavy traffic entrance areas
- Rubber matting

**Stair Protection**
- Stairtread protectors
- Stairshield
- Carpet protection film
- FloorShield stairtreads
- Foam post and handrail protection

**Door Protection**
- Door frame protection
- Door cill protectors
- Door Sleeves
- Full door protection panels
- Steel door protection pack
- TwinShield door protection

**Internal Protection**
- Appliance protectors
- Bubblewrap
- Building papers
- Corrugated cardboard
- Dust sheets
- Edgethoughs
- Furniture protection bags
- Insect mesh
- OckProps
- Overshoes & automatic dispensers
- Zip doors

**Fire Protection & Fire Stopping**

A range of flexible, lightweight and easy to install fire protection and fire stopping products for all types of installations.

**Firehalt® SF90**
SF90 is an ultra-lightweight fabric smoke and flame curtain that is totally non-combustible and has a full 90 min fire rating when tested to BS476 p20/22.

Supplied in handy sized rolls 120cm wide by 25m long which like all the other Firehalt® products utilises standard fixing components that are inexpensive and readily available. 12mm metal staples are used to join panels together vertically and horizontally.

**Firehalt® 30/30**
To help you cope with an increasingly competitive market Firehalt® has developed a lightweight fire rated cavity barrier that still offers a full 30 mins Insulation value when tested to BS476 p20/22.

Each pack weighs little more than 16kg but provides 8.4m² of product. In line with other products in the range it is quick to install using standard components such as 50mm stud and 25mm metal angle, and can be fixed from one side.

**Fire Stop Strips & Blocks**
Manufactured from high density mineral concrete and intended for installation within linear gaps and trapezoidal apertures to the head of internal wall applications.

- Independently tested
- Simple installation process
- Up to 240 minutes fire protection
- Manufactured to suit a specific trapezoidal profile (Fire Stop Blocks) or linear void up to 100mm in depth (Fire Stop Strips)
- Supported with additional acoustic test data

**Partition Head Fire Barrier**
A foil faced high density mineral fibre slab designed to suit partition head voids up to 600mm in overall height and provides a fire barrier above fire rated internal walls.

- Up to 240 minutes fire protection
- Will accommodate voids from 100mm – 600mm
- Manufactured to suit the overall void height
- Supplied with additional fixing clips and link strips where required
- Supported with additional acoustic test data

SIG Fire Protection Specialists are able to offer you expert and trusted advice on the supply of fire protection products and materials. Contact SIG to speak to your local fire protection specialist.
